Abstract

Today I setup a blog planet for Blue Obelisk members. First I tried Chumpologica but it did not read Atom feeds.

Today I setup a blog planet for [Blue Obelisk](#) members. First I tried Chumpologica but it did not read Atom feeds.

Next in line was [Planet](#) , which turned out to be used by many big planet sites, like [Planet Debian](#) . It also works with Atom feeds in general, but not well with Atom 1.0 feeds, like that of [Carsten](#). After some googling I found a [patched version](#) which did the job.

The result is at <http://www.woc.science.ru.nl/planetbo/> , but I hope that someone can arrange a <http://planet.blueobelisk.org/>.
