Abstract

Deepak blogged about screencasting for bio topics, concentrated at bioscreencast.com of which he is co-owner. I guess it is like a YouTube for bioinformatics thingies. Jean-Claude picked this up very quickly (seen on Cb? At least I did.), and already uploaded a screencast, demoing JSpecView written by Robert. I wonder if he will upload the screencasts he made for Bioclipse too?

chem-bla-ics

Deepak blogged about [screencasting for bio topics](#), concentrated at [bioscreencast.com](#) of which he is co-owner. I guess it is like a YouTube for bioinformatics thingies. Jean-Claude picked this up very quickly (seen on [Cb?](#) At least I did.), and already uploaded a screencast, [demoing JSpecView](#) written by [Robert](#). I wonder if he will upload the [screencasts he made for Bioclipse](#) too? (hint, hint ... :)

I have no idea if this site will be a success, but at least it has the right ingredients: tags, flash movies, clean UI, a [blog to monitor technological changes and improvements](#), and a page to request screencasts (with voting). What I only miss is a one summary page for each screencast to which I can easily link, for example for my [del.icio.us](#) account.
