This sunday starts the first [German Chemoinformatics Conference](#) in [Goslar](#). It's an interesting [programme](#) , with presentations on the InChI, PubChem, 25 years of chemoinformatics, the chemical semantic web, and much more.

Among these presentations is mine, on comparing crystal structures ([PDF](#)) and deducing cell parameters. But I'm having a poster on QSAR too.

I'll arrive on saturday afternoon in Goslar, so leave a message at the conference hotel if you want to meet up, and talk about my work, or yours, or the CDK, KDE, JChemPaint, Jmol, kfile_chemical, Kat/Chemistry, [BlueObelisk](#), Eclipse, R, or whatever else... I plan to have a modest german meal and one or two beers in the evening.

BTW, after Belém (Lissabon), Sintra, Boppard, Kinderdijk, Hoorn and Cologne, it's the 7th [UNESCO world heritage](#) site I'm visiting in just 14 months! Can't we just have conferences in Hawaii and sorts, like they do in other fields?? Oh, wait, we do: EuroQSAR is on a cruise boat.
