Abstract

Internet has the nice feature of bringing together people. This has helped many open source projects in the past. But it is also a convenient and cheap way to have conferences. Next month, the ChemConf 2006 conference will be held, and interested people only need to subscribe to a mailing list to participate.

chem-bla-ics

Internet has the nice feature of bringing together people. This has helped many open source projects in the past. But it is also a convenient and cheap way to have conferences. Next month, the [ChemConf 2006](#) conference will be held, and interested people only need to subscribe to a mailing list to participate.

The topic of this years ChemConf is Web-Based Applications for Chemical Education. At least three posters will show the use of Java applets in chemistry education, using [Jmol](#), [JChemPaint](#) and [JSPECView](#). I am (co-)author of two of them.

Again, participation is free. So join in!
