## chem-bla-ics

I ran into an [Eclipse Grep Console](#) plugin (EPL license) today that takes regular expression to color output in the Console. Given the amount of output [Bioclipse](#) and the [CDK](#) give when in DEBUG mode, this allows me to highlight those bits I am interested in. For example, comments on the *Bioclipse managers*:

```
<terminated> Bioclipse2 [Eclipse Application] /usr/lib/jvm/java-1.5.0-sun-1.5.0.17/bin/java (Mar
