No idea who the 22 persons are who were [willing to join my advisory board](#) , but they advised me to finish the JChemPaint work [Niels worked on this summer](#) :

Like my current main hobby project ([atom typing in the CDK](#)), the JChemPaint project will be performed in my non-working hours mostly. A reasonable ETA is, therefore, end of this summer. Main discussion on will be done on the [cdk-jchempaint](#) mailing list. Also note that the [JChemPaint project](#) at SourceForge is deprecated, because the code is now included in the [CDK project](#).

Over the next weeks, I will post more questions in the poll of this blog regarding the JChemPaint development. So, watch that space.
