Abstract

Last night I upgraded the software behind Chemical blogspace , to the version online on Google Code, though I needed the help from Eaun to get paper titles correctly picked up for ACS journals.

Last night I upgraded the software behind [Chemical blogspace](#), to the version [online](#) on [Google Code](#), though I needed the help from [Eaun](#) to get paper titles correctly picked up for [ACS journals](#). The number of working blogs is a bit down and now at [68](#), with an average number of 30 active blogs posting more than 100 blog items each day (see [Zeitgeist](#)). The new design looks like quite nice compared to the [old one](#):
