Abstract

Last night I upgraded the software behind Chemical blogspace , to the version online on Google Code, though I needed the help from Eaun to get paper titles correctly picked up for ACS journals.

chem-bla-ics

Last night I upgraded the software behind [Chemical blogspace](#), to the version [online](#) on Google Code, though I needed the help from [Eaun](#) to get paper titles correctly picked up for [ACS journals](#). The number of working blogs is a bit down and now at [68](#), with an average number of 30 active blogs posting more than 100 blog items each day (see [Zeitgeist](#)). The new design looks like quite nice compared to the [old one](#):

Welcome to Postgenomic

Postgenomic collects data from hundreds of science blogs and then does useful and interesting things with it.

With Postgenomic, you can:

- Find, read and subscribe to new science blogs
- Find out what scientists are saying about the latest books and papers
- Read mini-reviews, conference reports or even original research
- See the buzz surrounding different websites
- Browse different subject areas - chemoinformatics, organic chemistry, ... see the 'Explore' options on the top right hand side of the page for more.
