

# What metabolites are found in which species? Nanopublications from Wikidata

Egon Willighagen 

Published March 30, 2019

## Citation

Willighagen, E. (2019, March 30). What metabolites are found in which species? Nanopublications from Wikidata. *Chem-bla-ics*. <https://doi.org/10.59350/c7db7-70j94>

## Keywords

Nanopub, Cheminf, Wikidata

## Wikidata Metabolite-Species Nanopublications, version 20190217\_1246 (*Nanopub Index*)

### Description:

Nanopublications based on statements in Wikidata that specify in which species a particular molecule acts as metabolite, including reference on which that statement is based.

### Creation Time:

February 21, 2019 11:26:57 AM CET

### Creators:

## chem-bla-ics

In December I reported about Groovy [code to create nanopublications](#) . This has been running for some time now, extracting nanopubs that assert that some metabolite is found in some species. I send the resulting nanopubs to [Tobias Kuhn](#) , to populate his *Growing Resource of Provenance-Centric Scientific Linked Data* (doi:[10.1109/eScience.2018.00024](https://doi.org/10.1109/eScience.2018.00024), [PDF](#)).

Each data set comes with [an index pointing to the individual nanopubs](#), and that looks like this:

I wonder what options I have to archive the full set up nanopublications on Figshare or Zenodo, and see that DOI show up here...
