## chem-bla-ics

Some time ago I wrote about using [Bioclipse to query to MyExperiment.org SPARQL end point](#) . I think I had not mentioned that I have also written a manager to download [MyExperiment Bioclipse Scripting Language](#) scripts (though there are no GUI elements yet):

```
> myexperiment.search("RDF")  
[921, 928, 889]
```

```
> myexperiment.search("Kabsch")  
[937]
```

The returned lists give the workflow numbers for matching BSL scripts, which you can then simply download with:

```
> var file = myexperiment.downloadWorkflow(937)  
ui.open(file)
```
