Tobias commited Jumbo 5.0 to CDK CVS, so that the CDK is now again up to date with the latest CML library. Note that Jumbo 5.0 requires Java 5.0.

At first all JUnit tests seems to work, but apparently the CML2Writer tests were skipped because they were only run when Java 1.4 was found. I updated the test for the a appropriate Java version, and then it turned out that most tests fail. So those running CDK from CVS and depent on CML writing: hang on, it will be fixed very soon.
