Abstract

I have just enabled CIA statistics for the Blue Obelisk SVN : `/stats/project/cdk/blueobelisk` .

chem-bla-ics

I have just enabled [CIA](#) statistics for the [Blue Obelisk SVN](#) : </stats/project/cdk/blueobelisk> .

It's done by using the [ciabot_svn.py](#) client script and hooked into the `$REPOS/hooks/post-commit` hook on the SVN server. The client script is slightly hacked to hard code the module name, which otherwise did not show up on the [chat channel](#).
