As part of my scheduled re-posts during the summer break, I'll also post some of the [science videos](#) from the [archives](#). I originally posted these two on [February 24, 2013](#):

The first one is a TED talk by Michael Dickinson on how flies fly:

Michael Dickinson: How a fly flies

Michael Dickinson: How a fly flies

Video von YouTube laden. Dabei können personenbezogene Daten an Drittanbieter übermittelt werden. [Hinweise zum Datenschutz](#)

and the second one is on recording from fly visual neurons during flight and non-flight. This one was done in CalTech where Michael Dickinson used to work:

Brain recording from flying fruit fly
