Abstract

As of April 3, I will be working as postdoc in the group of Christoph Steinbeck at the Cologne University BioInformatics Center, or simply CUBIC, for a year. Though no exact plans have been decided upon, the work will include CDK, CML, ontologies, Bioclipse, semantic web technologies, Jmol, and other interesting things. Research areas will at least include QSAR, but I hope to touch bits of bioinformatics too.
