Git, Eclipse

Abstract

Recently, I have been blogging about Git:

Recently, I have been blogging about [Git](#):

- [GitToDo support for Freemind](#)
- [Git mirror for the CDK](#)
- [CDK development with branches using Git](#)
- [Offline CDK development using git-svn](#)

One concern expressed by people was the lack of integration with IDEs. Now, an [Eclipse plugin](#) seems well on its way:

With an experimental update site (<http://www.jgit.org/update-site>), the plugin is just an Eclipse reboot away.

Now, the plugin is still in its early stages and many [open feature requests](#), but fortunately the bug tracker can easily be [integrated with Mylyn](#), and is [still actively developed](#).

Cheers to Shawn and Robin for their work!
