#### chem-bla-ics

Recently, I have been blogging about Git:

- GitToDo support for Freemind
- Git mirror for the CDK
- CDK development with branches using Git
- Offline CDK development using git-svn

One concern expressed by people was the lack of integration with IDEs. Now, an Eclipse plugin seems well on its way:

With a experimental update site (http://www.jgit.org/update-site), the plugin is just an Eclipse reboot away.

Now, the plugin is still in its early stages and many open feature requests, but fortunately the bug tracker can easy be integrated with Mylyn, and is still actively developed.

Cheers to Shawn and Robin for their work!
