Abstract

Some weeks back there was the CDK5AW , the CDK 5th anniversary workshop. A small group of international open source chemo-, bioinformatics software developers met, among which two from Sweden.

Some weeks back there was the [CDK5AW](#) , the CDK 5th anniversary workshop. A small group of international open source chemo-, bioinformatics software developers met, among which two from Sweden. It was then decided to generalize their work resulting in Bioclipse:

<https://www.bioclipse.net/>

It's heavily using the [Eclipse Rich Client Platform](#) , making additional plugins trivial. OK, if this does not convince you: check the screenshots on the Bioclipse website.

It's a killer, really! Ola, Martin: great work!

PS. I am going to try to run it with free Java virtual machines this weekend, but if you have a working solution earlier than that, please leave a comment and screenshot in the comments.
