I just posted to below email to the cdk-user mailing list. Next Monday, I'll decide.

Hi all,

unless you have not read any news in the last two days, you will have seen that Google is rolling out a second batch of [Google Wave](#) accounts... I have one invite for someone who wants to co-develop the CDKitty robot, which adds [CDK](#)-based functionality to Google Wave...

The code is at: <https://github.com/egonw/cdkitty>

If you are interested in the account, please email me offline with:

- how you think you can contribute to the robot*
- why you want to do that*
- how much time you will have for it*

The position is open to anyway, and consider your email an application to the position :) (and, if you are a student, we could even try to arrange [Uppsala University](#) credit points, if you can work 20 weeks full time on it).

Egon ^^

BTW, existing Google Wave users can invite the robot by adding chemdevelkit@appspot.com.
