chem-bla-ics

That must be a record! Eric Jain wrote on [public-semweb-lifesci](#):

The latest release of the [UniProt](#) protein database contains just over a billion triples! PRESS RELEASE :-)*

The data is all available via the (Semantic or otherwise) Web:

<http://beta.uniprot.org/>

...or can be bulk-downloaded from:

<ftp://ftp.uniprot.org/>

- Counting some reification statements, and assuming no overlap between “named graphs”.*

P.S. This should be the last you’ll hear from me on this topic – I’m off to new adventures...

I surely hope this is not the last we hear of this huge RDF collection.
