Abstract

FriendFeed is a nice aggregation service allowing discussion of items posted from delicious, blogs, and any other RSS-based feed (e.g. my feed). It also has a room concept, where people can post stuff around a topic, such as a conference such as Science Blogging 2008 London, or the CDK:

FriendFeed is a nice aggregation service allowing discussion of items posted from delicious, blogs, and any other RSS-based feed (e.g. my feed). It also has a *room* concept, where people can post stuff around a topic, such as a conference such as Science Blogging 2008 London, or the CDK:

I have associated the RSS feed of the CDK bug tracker, the CDK News ASAP, and will shortly add the commits messages feed.
