Abstract

Today I installed PMD 4.2.5 in the CDK 1.2.x branch which contains mostly bug fixes compared to the 4.2.2 version we had earlier. Several of these include false positives: warnings which were not really problems, but tests going bad.

chem-bla-ics

Today I installed [PMD 4.2.5](#) in the [CDK 1.2.x branch](#) which contains mostly [bug fixes](#) compared to the 4.2.2 version we had earlier. Several of these include false positives: warnings which were not really problems, but tests going bad.

CDK Version	Last Compile	Unit tests	Fails	Errors	PMD Violations
1.2.3	2009-09-23	14012	78	16	8819
1.3.0	2009-09-28	14047	81	17	8836
1.2.3.git	2009-10-16	15285	85	25	6297
1.3.0.git	2009-10-15	15344	98	26	8881
1.3.0.git	2009-10-16	15353	98	29	9420
1.3.0.git	2009-10-14	14222	93	55	8898

The number of these false positives seems to be significant as the number of PMD violations for the CDK 1.2.x branch seems to have dropped about 1500! warnings :)
