chem-bla-ics

We all know [chemical space](#); [Chemical blogspace](#) (Cb) is different: it is the chemistry discussed in [blogspace](#). Cb is build on the [opensource software](#) of [Postgenomic.com](#) which I bloged on [before](#). The now running Cb aggregates [19 blogs](#) and, like the original, extracts linked (cited or reviewed) articles from literature.

The system is beta, but I am happy about it already that I mention it now. For example, some article titles are not properly recognized, and some journals are known in the statistics in several formats. And, more importantly, I have not yet hooked in the [InChI](#) support I developed earlier.

So, if you like the idea, or know other interesting scientifically interesting chemistry blogs, leave a comment, or send me email.
