## Citation

Willighagen, E. (2006, August 25). Chemical blogspace. *Chem-bla-ics*. <https://doi.org/10.59350/xge7p-17184>

## Keywords

Cb, Feeds, Chemistry

The screenshot shows the 'Welcome to Chemical blogspace' page in a Firefox browser. The page features a navigation menu with 'Home', 'Search', 'Papers', 'Reviews', 'Stories', 'Watchlist', 'Blogs', 'Zeitgeist', 'About', and 'Log in'. The main content area includes a 'Welcome to Chemical blogspace' section with a description of the site's purpose, a 'Getting started' section with links for searching and tracking papers, and a 'Current hot papers' section. The 'Current hot papers' section lists two articles: 'Macrocyclization by Ring-Closing Metathesis in the Total Synthesis of Natural Products: Reaction Conditions and Limitations' by Ana Gradillas and Javier Frez-Castells, and 'On outliers and activity cliffs--why QSAR often disappoints' by Gerald M Maggiora. A sidebar on the right contains sections for 'Posts of the day', a search box, 'Top keywords today', and 'Impact Factors'.
