On July 1st I will start a post-doc in [Wageningen](#), The Netherlands at the [WUR](#). More precisely, with a post-doc in the group of Prof. Van Eeuwijk at [Biometris](#), cooperating with the group of Prof. Hall at [Plant Research International](#) (PRI), within the framework of the new [Netherlands Metabolomics Center](#). The topic will be structure elucidation using mass spectral data originating from the experimental department of PRI, and will be a nice follow up on the work on SENECA [I have been doing last year](#) in the group of [Dr. Christoph Steinbeck](#) at the [CUBIC](#).
